Supplied Remote Controller Table

The supplied remote controller model and method of packaging varies according to system grade and destination market.

	K	P	M, X, Y
KA-892	RC-992 OR RC-160	RC-160	RC-992

→ Supplied with the amplifier.

→ Selected by the distributor according to the grade of the system and placed inside the outer carton (not supplied with the amplifier).

The RC-992 is a general system remote controller.
The RC-160 is a system remote controller with running function.

Protection circuit

While the protection circuit is operating, the indicator's alphanumeric display section flashes "-----".
The protection circuit operates when it detects power transistor over-current or output section DC drift.

Explanation of Back Panel Switch

This switches the input/output function of the TAPE 2/ADAPTOR.

(a) Conventional tape monitor function

(b) When this switch is set to the ADAPTOR side, it operates as follows:

- (1) When the front panel TAPE 2/ADPT switch is turned on, the MAIN VR lowers once to zero and then rises again, stopping near the middle.
- (2) While ① is in progress, no keys function besides the power switch.
- (3) While the TAPE 2/ADPT switch is on, the MAIN VR cannot be remote-controlled; other functions work normally.
- (4) When the TPAE 2/ADPT switch is turned off, the MAIN VR automatically lowers to zero, and henceforth all functions, including MAIN VR, work normally.

This function was included with the surround processors SS-592 and SS-992 in mind and is irrelevant except when used with these two surround processors.

79	S2/PH2	O	SCAN 2	Key scan 2
80	S3/PH3	O	SCAN 3	Key scan 3

CIRCUIT DESCRIPTION

Test Mode Specifications

As shown below, this unit has three test modes.

- TEST 1.....Test mode using the main unit's keys
- TEST 2.....RAM contents initial setting mode
- TEST 3.....Test mode using serial terminal

Addition: The RAM contents are returned to initial settings by unplugging from the AC power outlet during TEST 1 and TEST 3 modes.

Setting methods

- 1) TEST 1: Plug into the AC power outlet while pressing the CD DIRECT key
- 2) TEST 2: Plug into the AC power outlet while pressing the ENTER key
- 3) TEST 3: With POWER OFF, transmit serial code TEST ON (71H)

Usage methods

Operate the TEST 1 mode than all FL and LED indicators go on. Operate the TEST 2 mode then microprocessor is initial setting and POWER OFF mode (shipping mode).

Operate the TEST 3 mode then start serial operation in accordance with serial code list on next page.

- 1) TEST 1 (Operation through the main unit's keys)
 - a) Operate any key to cancel all the FL and LED indicators that go on.
 - b) MASTER VOLUME

The following keys are applied to VOLUME UP / STOP / DOWN, operating as follows.

VOLUME UP	= continuous increase with the control UP key.
VOLUME STOP	= stops UP/DOWN with the LEFT/RIGHT key.
VOLUME DOWN	= continuous decrease with the control DOWN key.

c) Graphic equalizer

Input of the EQ. ON key causes the following modes to repeat.

2) TEST 3 (Serial pin operation)

Normally the received serial code is sent just as it is. However, the following codes are exceptions:

TEST OFF (70H)	Serial code not sent
TEST ON (71H)	Serial code not sent
POWER (8CH)	System ON/OFF code (25H/26H) sent
SELECTOR [PHONO] (80H)	Position code (73H) sent
SELECTOR [CD] (81H)	Position code (74H) sent
SELECTOR [TUNER] (82H)	Position code (72H) sent
SELECTOR [TAPE1] (83H)	Position code (76H) sent
SELECTOR [TAPE2] (84H)	ON OFF code ON/ OFF=(7DH/7EH) sent
SELECTOR [VIDEO1] (87H)	Position code (7AH) sent
SELECTOR [VIDEO2] (88H)	Position code (77H) sent

Master volume

Uses the Volume UP (8FH)/DOWN (8EH) keys and continues to work when one transmission is carried out.

Also, when stopping KEY OFF (90H) is sent.

Note: Only the color-differentiated codes on the separate serial code chart operate.

KA-892

SPECIFICATIONS

(For U.S.A. and Canada)

Rated Power Output

125 watts per channel minimum RMS, both channels driven, at 8 Ω from 20 Hz to 20,000 Hz with no more than 0.03% total harmonic distortion. (FTC)

Total Harmonic Distortion LINE input to SPEAKER output

20 Hz to 20,000 Hz 0.03% at rated power into 8 Ω

Frequency Response

10 Hz to 50 kHz, +0 dB, -3 dB

Input Sensitivity/Impedance

Phono 2.5 mV/47 kΩ

Tuner/Tape/CD/VIDEO 200 mV/47 kΩ

Signal-to-noise Ratio (IHF-A)

Phono 75 dB for 2.5 mV input

Tuner/Tape/CD/VIDEO 100 dB

Phono Maximum Input Level

100 mV, T.H.D. 0.5% at 1 kHz

Output Level/Impedance

Tape REC (Pin) 200 mV/3.3 kΩ

Phono Frequency Response

RIAA standard curve ±0.5 dB (20 Hz to 20,000 Hz)

Graphic equalizer control

(60 Hz, 150 Hz, 400 Hz, 1 kHz, 2.4 kHz,

6 kHz, 15 kHz) ±10 dB

Loudness Control

+8 dB at 100 Hz (at -30 dB VOLUME Level)

General

Power Consumption 2.8 A

AC outlets

SWITCHED 3; (Total 100 W, 0.8 A max.)

Dimensions

W: 440 mm (17-5/6")

H: 133 mm (5-1/4")

D: 281 mm (11-1/16")

Weight (Net) 9.5 kg (20.9 lb)

Note:

KENWOOD follows a policy of continuous advancements in development. For this reason specifications may be changed without notice.

Note:

Component and circuitry are subject to modification to insure best operation under differing local conditions. This manual is based on the U.S.A. (K) standard, and provides information on regional circuit modification through use of alternate schematic diagrams, and information on regional component variations through use of parts list.
